Accessories

STANDARD

BP2501
2500mAh*1

BC35*1

Power Adapter &
MicroUSB Cable*1

OPTIONAL

MCA22 Multi-unit charger

✓ Charge 6 x bodycams and 6 x batteries at the same time

✓ LED status indicators

✓ Automatically upload the audio/video/photo *

✓ Programme & upgrade VM685 *

(* Software required)

✓ Includes power adapter*1, data cable*1
MicroUSB Earphone

Radio Connecting
Cables

Applications

RVM Manager *d*esigned to configure the bodycam, manually download media files and perform firmware upgrade. Ideal for demonstration, a basic bodycam management software

IDS (Integrated Device Station) *d*esigned to save human resources by extracting the media files from the bodycam and store in the PC automatically. Provides Admin/User interface for multi-purposes and Digital Evidence Viewer for edit/tag/delete.

DEM (Digital Evidence Management) *d*esigned to download extracted media files from (up to) 50x IDS stations. Downloaded files can be view on any smart devices via browser. Provides Admin/User interface and groups to isolate different businesses and data privacy is considered.

Errors and omissions excepted (E&OE)

Scenario 1 : Single location ≤ 10 users

Products

RVM Manager
Designed to configure the bodycam, provide access to data and perform firmware upgrade
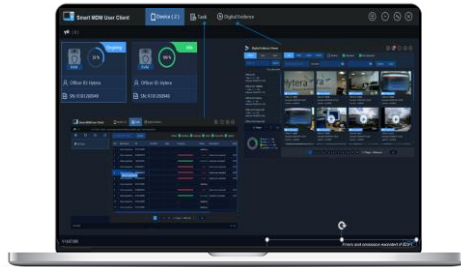

Bodycams
4x VM550D
4x VM685

Additional accessory
MCA22

- Password protected to access RVM Manager
- Individual configuration & firmware upgrade
- Manual data collection
- Connects up to 10 x VM685

Errors and omissions excepted (E&OE)

Scenario 2 : Single location ≥ 50 users

Products

RVM Manager
Designed to configure the bodycam, provide access to data and perform firmware upgrade

MDM IDS (Integrated Device Station)
Designed to extract media files, memory restores, creates logs, and provide playback in Digital Evidence Viewer

Bodycams
25x VM550D
25x VM685

Additional accessory
5x MCA22

- Full automatic media files extraction process
- No human resources required
- Password protected to edit and access Digital Evidence Viewer
- Process 16x bodycams simultaneously then move on to next batch
- Utilise MCA22 for charging & data extraction

Scenario 3 : Multiple Locations ≥ 250 users

Products

RVM Manager
Designed to configure the bodycam, provide access to data and perform firmware upgrade

50x MDM IDS (Integrated Device Station)
Designed to extract media files, memory restores, creates logs, and provide playback in Digital Evidence Viewer

1x DEM (Digital Evidence Management)
Designed to download extracted media files from IDS, supports up to 50x IDS sites. Password protected to access via browser on any smart devices to view, edit and delete.
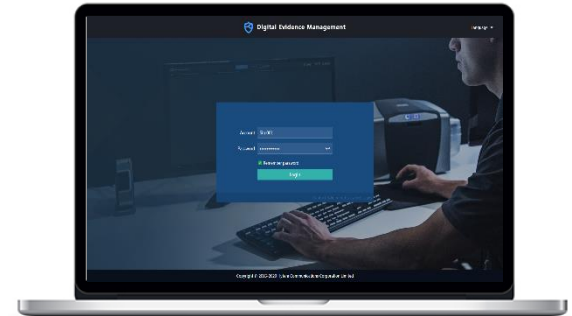

Bodycams
250x VM685

Errors and omissions excepted (E&OE)

Legislation Guidance

- The **data controller** for the organisation (end user) is the person tasked with management of the bodycam media, including how this data is processed.

- The **data controller** must consider the security of footage for unauthorised access and long-term storage, including its accessibility in response to a subject access request.

- Given the potentially active nature of individuals wearing BWV, **data controllers** must also take into account the increased likelihood of loss or theft. This is why it's important to utilise a device which doesn't have removable storage.

It's the responsibility of the end user to provide the processes and secure environment in which to operate and handle bodycam data.

Errors and omissions excepted (E&OE)
